

Introducing empulse Mobile

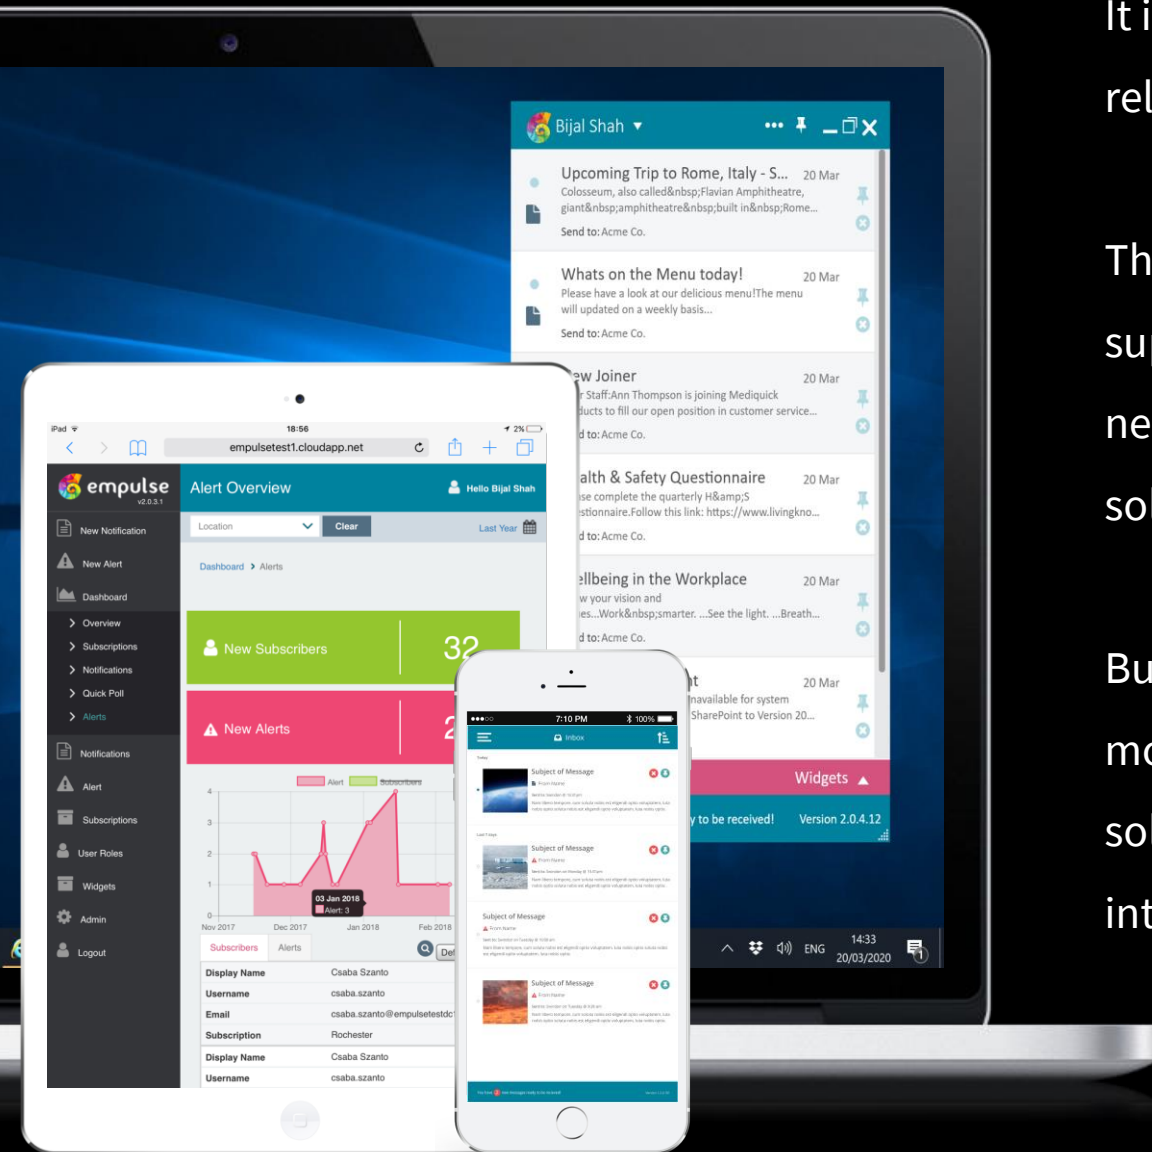

Our goal at *empulse* is to provide the best in class engagement platform for your organisation.

With the recent pandemic it has become more clear than ever that organisations need to be able to adapt their working patterns and processes to suit remote or hybrid environments.

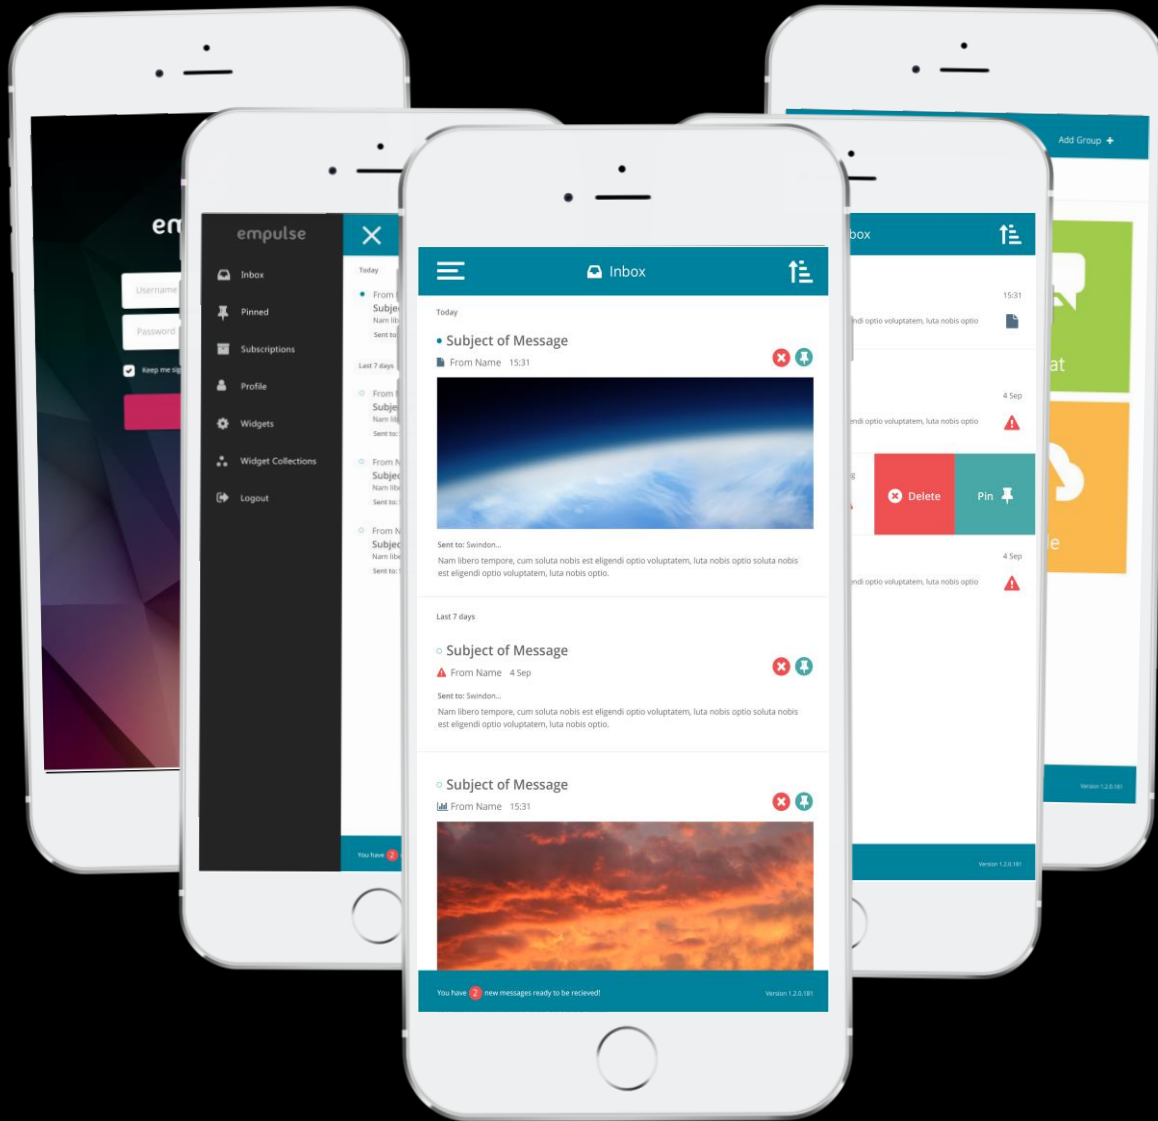

To help you continue your enterprise communications in the ‘new normal’, we are pleased to introduce *empulse* mobile.

It is important for us to ensure that our solutions remain useful, relevant and valuable to you.

This not only means continuing to provide enterprise-grade support, rich features, robust security, excellent reporting and near real-time data, but also ensuring that we are evolving our solutions to keep pace with changes in your industry.

Built from the ground-up for a touch-first experience, empulse mobile neatly complements our desktop, web and tablet solutions, giving your employees the flexibility to receive and interact with your communications as they would like to.

- Mobile, tablet, web and desktop. *empulse* has you covered for however your team is working today.
- Mobile experience specifically designed for the touch-first experience
- Receive notifications in-app, via push notifications or directly via SMS
- Manage your subscriptions, user profile and preferences
- Interact with the messages you receive and send feedback to the business in near real-time
